

# TEVERETERNO

Twelve proposals for the Tiber by Kristin Jones

## FLUVIALE

Materials: Video Projections  
Dimensions: 43' H x 1239' L (13m H x 530m L)

*Fluviale* will be a seamless wall of dancing light, projecting the Tiber's ever-flowing current along the entire length of the Piazza Tevere's right embankment throughout the evening hours.

Walking along the site's bank, the viewer will be suspended in an immersive experience between light and water, where the dark, horizontal surface of the river meets its luminous, vertical reflection. Mirroring the plane of moving water that travels through the site unnoticed, the work's fluid motion will defy gravity – drawing the animate river onto the walls of the rectilinear Piazza Tevere.

*Fluviale* is intended to reveal the beauty and phenomenon of the Tiber River's dynamic force as it makes its passage through the City of Rome, magnifying its physical presence and vital energy.
