

# MONTH - LONG SOUND INSTALLATION

OPENING ON APRIL 24TH - CLOSING ON MAY 15 TH

SOUND INSTALLATION PROJECT BY DAVID MONACCHI

Multichannel system positioned on the right wall with n.17 (-1) points of diffusion for uniform coverage and panning possibilities.

#### Electroacoustic chain:

(Every piece of equipment will be positioned on the right side)

- Power generator on the street
- N. 17 (-1) active audio diffusion points with speakers facing down / toward the center of bank
- D/A converters and computer on DANTE system on the right upper marciapiede (Lungotevere)

#### Set-up notes

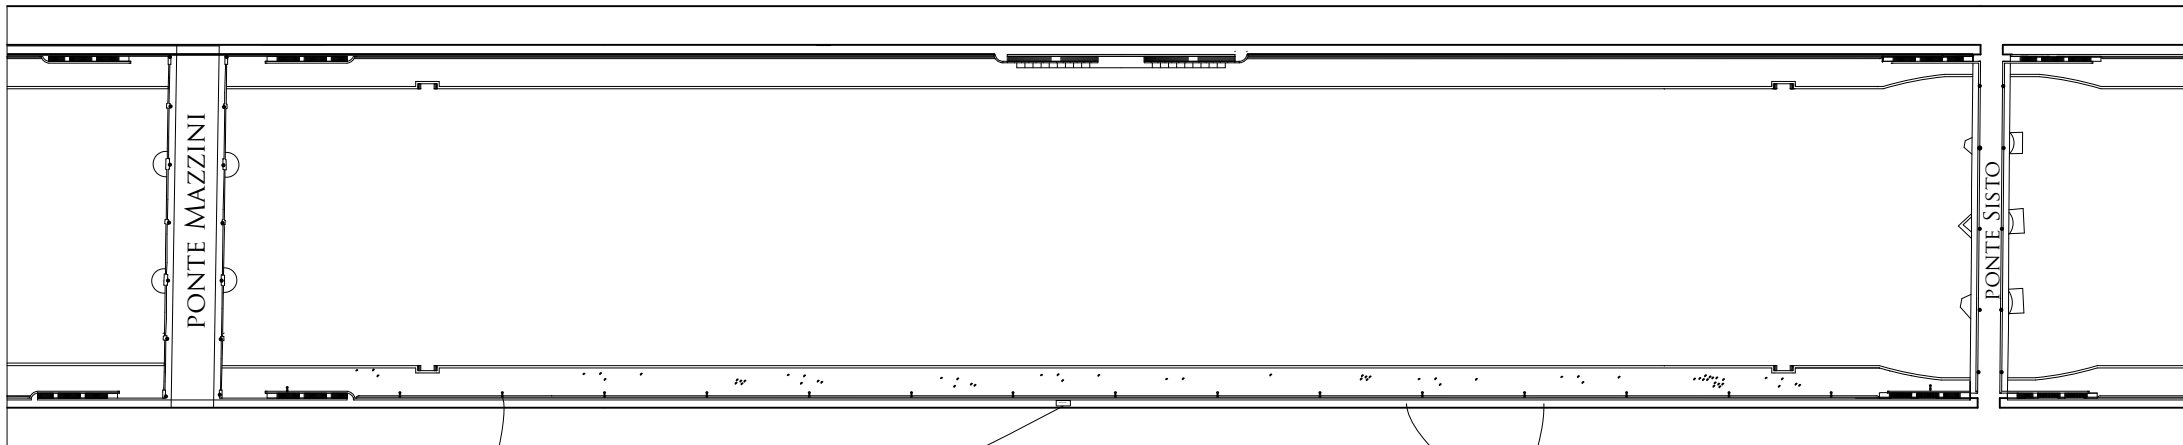

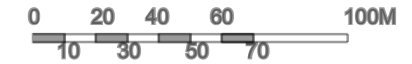

- A truck with "cestello" will be needed for setting up the system
- n.17 (-1) waterproof speaker covers

To be still verified (STEP Srl and V. Sassanelli):

- 1) weight (62Kg needed) that each street lamp structure can support;
- 2) permissions needed for diurnal and nocturnal sound in public space.

The diffusion system will be visually non-invasive and will allow virtual movements of the recorded bands and many mixing possibilities for additional needs.
