

RIVER TO RIVER Festival - NYC

On Friday, May 30th, NYC will host the "RIVER TO RIVER FESTIVAL" which will showcase animation projected onto New York Harbor. Below is a take on the event from Artist and Animation Director Maureen Selwood. (Her work entitled "She Wolves" will be featured in the festival).

"It was amazing to be able to create an animation that is to be projected in the New York Harbor with a 20,000 lumens projector. Joe Kim created the correct file size here at DUCK once the animation tests were done in NY. It is a thrill to be part of the NYC River to River Festival, Friday, May 30th at the South Street Seaport. Projecting animation onto water adds another exciting dimension. The sound too will be pretty dramatic as many of the sounds are reminiscent of harbor sounds with wolves howling in the background."
